

ASTROLOGY FOR JULY

This is your at-a-glance guide to the prevailing astrological conditions that we'll experience during the coming month of July.

Sun

This month the sun is mainly in CANCER.

The overarching energy is on nurturing, emotion and sensitivity. On the 22nd the sun moves to LEO and the prevailing energies will shift to confidence, energy and charisma.

Mercury

This month Mercury is in Retrograde motion in CANCER - the Retrograde will end on the 23rd July. Due to the Retrograde our communication will likely be introspective, and possibly disrupted or challenging, influenced by the following traits of Cancer - emotional, sensitive, nurturing.

Mars

This month Mars starts in GEMINI and remains in this constellation for the remainder of the month. Our desire-nature and our will to action will therefore be influenced by the following traits; Gemini - intellect, sociability, changeability.

Venus

This month Venus starts in LEO until 10th when it will begin its transit of VIRGO. Our love and relationships will therefore be influenced by the following traits: LEO - confident, sassy, loyal. VIRGO - disciplined, controlled, practical.

Saturn

Saturn is in ARIES where it will remain until April 2028.

Our karma, lesson integration and work ethic for this two-year period will therefore be influenced by the following traits; Aries - ambition, boldness, confidence.

OTHER NOTABLE EVENTS....

Pluto went retrograde in Aquarius on 6th May and will remain so for 5 months, marking a fortuitous time for inward focused shadow work and personal transformation. Neptune goes retrograde on 8th July, until December 12th, turning our dreaming and psychism inwards.

We commenced Mercury Retrograde in Cancer on 29th June, starting a period of introspection and challenge around communication and expression, which may feel emotional.
